***Allowable Subject Matter***

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 1, more particularly define the structure of a rewritable optical recording carrier which comprises: a first recording stack of layers which includes a first dielectric, a recording layer, a second dielectric and a mirror layer which is composed of a mixture comprising aluminum or silver as main component. There exist a specific relationship between the thickness of the first dielectric and the thickness of the second dielectric when the mirror layer comprises aluminum or silver. These particulars, combined with remaining claimed elements are not suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
